Insurance: Mathematics and Economics 3 (1993) 305
North-Holland

Author index volume 13

(The issue number is given in parentheses)

Bacinello, A.R. and **F. Ortu**, Pricing equity-linked life insurance with endogenous minimum guarantees: A corrigendum (3) 303–304
Beyer, D. and **M. Riedel**, Remarks on the Swiss premium principle on positive risks (1) 39– 44
Carriere, J., A semi-parametric estimator of a risk distribution (1) 75– 81
Gregorius, F.K., Disability insurance in The Netherlands (2) 101–116
Haberman, S., Pension funding with time delays and autoregressive rates of investment return (1) 45– 56
Haberman, S., Pension funding: The effect of changing the frequency of valuations (3) 263–270
Haberman, S., *see* **A. Zimbidis** (3) 271–285
Hertzman, E., Summary of talk on 'Work of the CMI PHI Sub-Committee' (2) 117–122
Hesselager, O., Extensions of Ohlin's lemma with applications to optimal reinsurance structures (1) 83– 97
Kaas, R., How to (and how not to) compute stop-loss premiums in practice (3) 241–254
Linnemann, P., On the application of Thiele's differential equation in life insurance (1) 63– 74
Machnes, Y., Production decisions in case of monotone likelihood ratio shifts of cumulative distribution functions (3) 299–302
Mackay, G., Permanent health insurance: Overviews and market conditions in the UK (2) 123–130
Michel, R., On Berry–Esseen results for the compound Poisson distribution (1) 35– 37
Ortu, F., *see* **A.R. Bacinello** (3) 303–304
Panjer, H., *see* **S. Wang** (3) 287–297
Ramsay, C.M., Annuity distributions: A new class of compound Poisson distributions (1) 15– 22
Riedel, M., *see* **D. Beyer** (1) 39– 44
Segerer, G., The actuarial treatment of the disability risk in Germany, Austria and Switzerland (2) 131-140
Szynal, D. and **J.L. Teugels**, A stop-loss experience rating scheme for fleets of cars, Part II (3) 255–262
Teugels, J.L., *see* **D. Szynal** (3) 255–262
Vandebroek, M., Bonus–malus system or partial coverage to oppose moral hazard problems? (1) 1– 5
Veraverbeke, N., Asymptotic estimates for the probability of ruin in a Poisson model with diffusion (1) 57– 62
Verrall, R.J., A state space formulation of Whittaker graduation, with extensions (1) 7– 14
Wang, S. and **H. Panjer**, Critical starting points for stable evaluation of mixed Poisson probabilities (3) 287–297
Yor, M., From planar Brownian windings to Asian options (1) 23– 34
Zimbidis, A., and **S. Haberman**, Delay, feedback and variability of pension contributions and fund levels (3) 271–285
